Product Details

EnvironPrint Square Business Card Printing Services

Square business cards send the message that you're not afraid to do things a little bit differently. These unique business cards make a memorable impression with customers and clients, especially when you choose a high-quality printing company like EnvironPrint to print your custom square business card design.

Use square business cards as a networking tool at trade shows and conferences or give them to your customers so they can share your information with others easily when they're making a referral. Square business cards can be used to share promotional codes or coupons, social media information, office hours, and website URLs, in addition to all of the standard contact information. When creating a square business card, you'll need to spend some time thinking about what you want to include because there isn't as much room as with a standard business card. This means space must be used carefully. We suggest including your company's logo on one side and using complementary colors and fonts for your personal contact information on the other side.

One of the benefits of using EnvironPrint for square business card printing is that our team is available to help you through every step of the ordering process to ensure that you're happy with your final product. Please contact us if you have any concerns about your business card design, finish selection, or paper choice.

Highlights of our business cards include:

- 3 sizes to choose from
- High-quality cardstock
- Your choice of 4 different finishes, including gloss, matte, and premium options
- Printing is in full color on both sides
- Lightning-fast turnaround times

Square Business Card Printing Options

The possibilities are endless when you choose EnvironPrint to print your square business cards. Use our templates to design your own customized business cards, then choose from the following options:

Size

2" x 2"

2.5" x 2.5"

3" x 3"

To choose a different size than those listed above, simply enter the measurements you'd like in the height and width fields.

Finishes

Gloss - For vibrant colors and bold graphics, you can't go wrong with a classic gloss finish.

Matte - Matte is an excellent option for simple or traditional business card designs.

Premium Soft-Touch Matte - Our premium matte finish offers a luxe appearance and a unique tactile appeal that complements square business cards.

Premium High Gloss UV - High gloss UV finish adds depth and dimension to square business cards that feature photography.

Frequently Asked Questions About Square Business Card Printing

How big should a square business card be?

While we offer three different size options for square business cards, the one most commonly used is 2.5" x 2.5". That said, because square business cards are already non-traditional, there's no need to stick to a certain size or shape.

What is the thickness of EnvironPrint square business cards?

We offer 16 pt., 18 pt., and 24 pt. cardstock for square business cards.

What types of finishes are available for square business cards?

Our square business cards come in standard gloss, standard matte, premium soft touch matte, and premium high gloss UV finishes. If you're not sure which finish is best for your design, our team is happy to help you understand the different options that are available.

Can I print on both sides of EnvironPrint square business cards?

Yes, our square business cards can be printed on one side only or on both sides. We recommend choosing to print on both sides with a square design, as this allows you to make the most of a limited amount of space. A graphic or company logo on one side with contact information on the opposite side works well for square business cards.

How can I design my own square business cards?

For your convenience, we offer an online design tool and downloadable templates that you can use with your favorite graphic design program. If you're using one of our square business card templates, simply upload your finished design to our website when you're ready to place your order. If your cards are being designed by a professional graphic designer, you can send them our downloadable template so they can use it to create your square business cards.

How long will it take to get my square business cards?

You can count on EnvironPrint to get your square business cards printed fast. Simply choose your preferred printing time when placing your order. We have also posted our shipping rates and delivery estimates on our website to help you estimate when your cards will arrive. Choose premium shipping for an estimated delivery in 1-2 days after shipment. Please call us at 602-252-0578 if you have a tight deadline and need your project completed as soon as possible. No matter how soon the deadline, we'll go the extra mile for you.

Why Choose EnvironPrint for Square Business Card Printing

For nearly two decades, EnvironPrint has been providing the highest quality printing services to our customers. With exceptional value, quick turnaround, and dedicated service, it's easy to see why we're a leading choice for digital printing on the internet. We use recycled materials and water-based inks that are free of solvents and other VOCs because we're committed to making printing more sustainable. Our goal is to prove that you never have to sacrifice quality for eco-friendly printing solutions.
